The Human Factor Xa was activated from Human Factor X by activation with X Activator-RVV (Russells' Viper Venom). This RVV-X was removed after activation. Complete activation is observed on SDS-PAGE. The above protein was purified from Human plasma units that test negative for antibodies to HBc, HCV, HIV 1/2, HTLV-I/II, and non reactive for HBsAg, HIV-1 RNA, HCV RNA, HBV DNA and Syphilis by FDA approved tests. Donors are screened for CJD.
