Immunogen: Human Prothrombin purified from plasma.

This antibody is specific for the fragment 2 region of prothrombin. When tested by immunoelectrophoresis, a single arc of reactivity was observed with plasma and with purified prothrombin fragment 2. No reactivity was observed with thrombin or with prothrombin deficient plasma. This product can be used for the immunodetection of prothrombin and fragment 2.

Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory. For research use only.
