This antibody has been affinity adsorbed to remove non-PK reactivities. The adsorbed antibody is specific for PK as demonstrated by immunoelectrophoresis and ELISA. Both Prekallikrein and Kallikrein are recognized. This product is suitable for use in immunoassays of PK and its activation products, and in neutralization studies where antibodies are required to inhibit the activity of PK. Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory. For research use only.
