Immunogen: Thrombin prepared from purified rabbit prothrombin, active site blocked with PPACK
Prior to conjugation, the antibody was found to be specific for rabbit thrombin or prothrombin as demonstrated by immunoelectrophoresis and ELISA.
Suitable as a source of peroxidase labelled antibodies to rabbit thrombin or prothrombin.
Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory.
For research use only. Avoid exposure to sodium azide as this is an inhibitor of peroxidase activity.

Thank You,
