No reaction was observed with normal human plasma using immunoelectrophoresis and immunodiffusion techniques. This product can be used as a negative control in procedures where sheep antibodies are used, such as ELISA and immunoblotting.

The above protein was purified from Human plasma that was tested and found negative for HIV-1, HIV-2, Hepatitis B Surface antigen and HCV. Donors are screened for CJD (Creutzfeldt-Jakob Disease).

Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory. For research use only.
