Immunogen: Recombinant Plasminogen Activator Inhibitor type 1 (PAI-1) prepared from bacterial culture supernatants.

Prior to conjugation, this product is specific for PAI-1 as demonstrated by immunoelectrophoresis and ELISA. This product is suitable for use as detecting antibody in ELISA's for PAI-1 in plasma.

Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory.

Avoid exposure to sodium azide as this is an inhibitor of peroxidase activity. For research use only.

Store between -10 and -20 C. Product will become viscous but will not freeze. Avoid storage in frost-free freezers. Keep vial tightly capped. Allow product to warm to room temperature and gently mix before use.
