Prior to conjugation, this antibody was specific for TAFI as demonstrated by immunoelectrophoresis and ELISA. Suitable as a source of peroxidase-labeled antibodies to TAFI.

Store between -10 and -20 C. Product will become viscous but will not freeze. Avoid storage in frost-free freezers. Keep vial tightly capped. Allow product to warm to room temperature and gently mix before use. Optimum conditions for use of this antibody in analytical procedures should be established in each laboratory. Avoid exposure to sodium azide as this is an inhibitor of peroxidase activity. For research use only.
